

As a dedicated subscriber to XM Satellite Radio, I fully support the rights of XM to provide Instant Traffic & Weather. XM provides a variety of services with high quality. These services are provided to PAYING CUSTOMERS and should not be governed by the NAB. I urge the FCC to kindly reject NAB's petition 04-160. Those who are not willing to pay for such services have many other avenues in which to obtain information.

Thank You,
Larry Smith
